

## Kineo Technical Test

Task...

Build a mini web app to provide a poll of voting intention for an upcoming (General) election.

The web app should allow a user to specify their constituency along with enter answers to the questions *"Are you going to vote?"* and *"Who are you going to vote for?"*.

It should display the results for *all* users nationally and for each constituency.

You may use:

- PHP
- JavaScript
- MySQL or PostgreSQL
- Any freely available (PHP) web dev framework

We expect you to submit something that works, alongside instructions/documentation describing
